Software Developer with hands-on experience building real-world applications through freelance and independent product development. Strong foundation in Java, Data Structures & Algorithms, OOP, and backend development, with experience designing APIs, integrating security tools, and developing user-focused software solutions.

EXPERIENCE

Quibits

Navi Mumbai, Maharashtra

Software Developer Intern

Jan 2025 – June 2025

- Developed web application features using Java (Spring Boot) and React.js.
- Built and integrated RESTful APIs for frontend-backend communication.
- Developed responsive dashboards for reporting and user management.
- Debugged and resolved application issues while collaborating with the team using Git and Agile practices.

Grandeur Events

Mumbai, Maharashtra

Freelance Event Coordinator and Planner

Dec 2023 – May 2025

- Coordinated large-scale events for clients including Amazon and Microsoft, managing end-to-end execution.
- Led teams of 5–30 volunteers; handled logistics, vendor coordination, and real-time issue resolution.
- Contributed to 50+ events, demonstrating strong coordination, adaptability, and stakeholder management.

PROJECTS

Vulnerability Assessment System

Real-World Freelance Project

June 2026 – Present

- Developing a real-world vulnerability assessment platform for a client, automating SAST, dependency vulnerability, and secret scanning using OpenGrep, OSV-Scanner, and GitLeaks.
- Building the Node.js/Express.js backend for secure source-code processing, scanner orchestration, result aggregation, MongoDB persistence, and security report generation.
- Developing a React.js dashboard with real-time scan progress, vulnerability analytics, findings, scan history, and downloadable reports for actual end users.

Intelligent Traffic Surveillance System

College Mini Project

2025

- Built a real-time system detecting 5 traffic violations from CCTV/RTSP streams using YOLOv8 and DeepSORT for detection and tracking; work published as a research paper.
- Applied homography for speed estimation (3.2 km/h error).
- Developed HSV-based signal detection, rule engine (18–22 FPS CPU), and OCR pipeline using EasyOCR with FastAPI + SQLite storage.

RestoQR — Restaurant Ordering and Operations Platform

Independent Development Project

Jan 2026 – Present

- Contributed to a real-world platform with active users, solving workflow problems across ordering, kitchen operations, POS, billing, and administration.
- Developed and improved end-to-end workflows, reducing manual steps and improving efficiency across customer and restaurant operations.

EDUCATION

Bachelor of Computer Science and Engineering

2026

Indira Gandhi College of Engineering, Ghansoli (Autonomous Institute Affiliated to Mumbai University)

ACHIEVEMENTS, ACTIVITIES AND LEADERSHIP

Hackathon Winner 2026

Won Multiverse of Tech Hackathon (Smt. Indira Gandhi College of Engineering) among ~40 teams. Developed a MERN stack application for 3D model-based estimation of materials, cost, and construction timeline.

SKILLS

- **Programming Languages:** Java, JavaScript, C++
- **Frameworks & Libraries:** React.js
- **Databases:** MySQL
- **Tools & Technologies:** Git, GitHub, Docker, Firebase, Postman
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
