Professional Summary

Software Engineer with hands-on industry and freelance development experience, strong Java and DSA problem-solving skills, and a track record of delivering solutions through teamwork and hackathons. Eager to contribute to scalable software development while continuously learning and applying new technologies.

Experience

Software Developer Intern Jan 2025 – June 2025
Quibits *Navi Mumbai, Maharashtra*

- Developed full-stack web application features using Java, Spring Boot, and React.js across application workflows.
- Engineered RESTful APIs enabling reliable frontend–backend integration and seamless application data exchange.
- Built responsive dashboards for reporting and user management, improving usability across application workflows.
- Debugged application issues and collaborated with developers using Git and Agile practices for maintainable delivery.
- Integrated frontend components with backend APIs to deliver reliable, maintainable end-to-end application workflows.

Freelance Event Coordinator and Planner Dec 2023 – May 2025
Grandeur Events *Mumbai, Maharashtra*

- Coordinated 100+ events for Amazon, Microsoft, and other clients, managing logistics, vendors, and on-ground execution.
- Led 5–30 volunteers, overseeing stakeholder communication, resource allocation, and problem-solving for seamless delivery.

Projects

GARUDX – Application Security Platform | *Real-World Freelance Project* June 2026 – Sept 2026

- Developed a full-stack security platform automating source-code vulnerability scanning, dependency analysis, and hardcoded-secret detection using Semgrep, OSV-Scanner, and Gitleaks.
- Built Node.js/Express.js APIs for project uploads, scan orchestration, vulnerability normalization, MongoDB persistence, and security report generation.
- Implemented a React.js dashboard for scan progress tracking, vulnerability analytics, findings management, scan history, and downloadable reports.

Intelligent Traffic Surveillance System | *College Major Project* Navi Mumbai, Maharashtra – 2025

- Built a real-time traffic surveillance system detecting 5 violations from CCTV/RTSP streams using YOLOv8 and DeepSORT.
- Achieved 3.2 km/h speed estimation error and 18–22 FPS using homography, HSV signal detection, and EasyOCR with FastAPI/SQLite; research paper published.

RestoQR – Restaurant Ordering and Operations Platform | *Live Project* Jan 2026 – Present

- Contributed to a real-world restaurant platform integrating QR ordering, kitchen operations, POS, billing, inventory, and administration into a unified workflow.
- Developed and improved end-to-end workflows across customer, kitchen, cashier, and management operations, reducing manual steps and improving operational efficiency.

Education

Bachelor of Computer Science and Engineering 2026
Indira Gandhi College of Engineering, Ghansoli (Autonomous Institute Affiliated to Mumbai University)

Achievements, Activities and Leadership

Multiverse of Tech Hackathon | *Winner, 2026*

- Won among ∼40 teams at Smt. Indira Gandhi College of Engineering by developing a MERN stack application for 3D model-based estimation of materials, cost, and construction timeline.

Hackverse Spacetech Hackathon | *1st Runner-Up, 2026*

- Built AEGIS, a Python-based spacecraft health monitor using Isolation Forest, NumPy autoencoders, and anomaly detection.
- Implemented explainable root-cause analysis, digital-twin fault simulation, and safety-validated mitigation recommendations.

Technical Skills

Programming Languages: Java, Python, JavaScript, C++

Frameworks & Libraries: Spring Boot, React.js, Node.js, Express.js, NumPy, scikit-learn

Backend & Software Development: REST APIs, API Integration, Asynchronous Job Processing, Database Design

AI/ML: Neural Networks, Autoencoders, Isolation Forest, Anomaly Detection, Statistical Analysis, Root-Cause Analysis

Databases & Developer Tools: MongoDB, MySQL, Git, GitHub, Docker, Postman

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
